

Hydroxychloroquine

I had all the symptoms of COVID, but had no insurance so I could not go to the doctor. People I personally know that went to a doctor and tested positive, were sent home and just try to get over it. One person I knew, said she didn't get any medicine, just was sent home.

If you saw the America's Frontline Doctor's on TV that spoke about Hydroxychloroquine and were silenced. I have a website you can go to get this medicine by only having the symptoms.

A doctor at my daughter's church gave her this information. My daughter did not have insurance either. Amazingly, they were able to get the hydroxychloroquine. The same day!

Go to the website is AFLDS.com and to go to the website and click on HCQ link with your state.

Click on: your state of residence.

Scroll down: Speak to an MD

Fill out the questionnaire and pay the \$90 fee. Answer all the questions and follow any instructions, so that you don't miss their call.

I got to speak to a doctor the same day (up to two days), but I got my callback from a doctor the same day, within an hour.

After the quick 10-15 minute visit, the doctor prescribed hydroxychloroquine and one other medicine. They find a pharmacy close to you that will prescribe it. I had my medicine the same day!

I truly believe this saved my life!
